Behavioral Directions offers assessment and treatment to individuals within the autism spectrum disorder. Behavioral assessment and treatment plans are implemented in natural settings to enhance progress, thus we introduce and supervise services in home, school and community settings to gain the best understanding of identified behaviors and ensure generalization to “real life” settings.

Consults in autism and related developmental disabilities and provides educational advocacy, parent/staff training, supported inclusion, and collaboration with related professionals.

Caseload is kept small so service delivery, effectiveness and program integrity can be maintained.

Also serves Montgomery County, Maryland.

Service Area(s)

Fairfax City

,

Fairfax County

,

Falls Church City

,

Loudoun County
