English

Winchester Rehabilitation Center offers outpatient rehabilitation services including comprehensive physical, occupational and speech therapy. The program is a cost effective alternative to inpatient hospital care.

Participants in Outpatient Rehabilitation may continue living at home, therefore emphasizing their independence. Each patient learns how to achieve their maximum potential through a program carefully designed for their specific disability or injury. Referrals are accepted from physicians, healthcare professionals, and from a patient or their family. Patients are screened on the basis of individual rehabilitation potential and their desire to benefit from a comprehensive day rehab program. A doctor's order is required.
