Henriette Kellum, LCSW provides assessments for guardianship and conservatorship. For these assessments, Henriette conducts a thorough review of the client's presenting circumstances and events precipitating the request for guardianship/conservatorship. She does this by conducting interviews with service providers and family members involved with the client as appropriate and as permitted by the responsible party. Henriette interviews the client in their home environment and conducts a comprehensive mental status exam during which she notes the client's areas of strength and areas of challenge. Her final report includes a mental health diagnosis, a list of current medications the client is taking and impressions and recommendations. Impressions of activities or decisions the client is not able to make on his/her own are specifically stated.

The provider also provides services in the Dutch language.
