\$0.00

Event Description

Deep Brain Stimulation (DBS) for Parkinson's Disease is a seminar featuring a neurosurgeon specializing in surgical treatments for movement disorders. Learn about deep brain stimulation (DBS), a procedure used to treat Parkinson's disease, essential tremor and dystonia. Registration is required to help us prepare. Seating is limited. Call 434-447-0917 to register or register at [vcu-cmh.org](https://www.vcu-cmh.org). Enter Education Center through the main entrance to the hospital. Enjoy refreshments and register for door prizes.
