Centra Alan B. Pearson Regional Cancer Center was opened in 2008 and combines radiation and medical oncology. Personalized treatment plans for patients and support services through every step of their treatment are provided. Patients can do research in the resource library and visit with the chaplain or talk with the clinical trials coordinator about new studies.

Diagnostic technology includes magnetic resonance imaging (MRI), scanners to computerized topography scanners, surgery, x-rays and mammography and the new high-powered Trilogy and Varian 21EX systems. Please call for more information.
