Dominion's Partial Hospitalization program provides a therapeutic environment for individuals who have acute or chronic mental or emotional disturbances who do not require full-time hospital care. This level of care is ideal for those adults who are able to function at home for short periods of time but need assessment to identify and treat issues that are not successfully treated in an outpatient setting. Services may include individual, group and/or family therapy; social and recreational activities; and a range of adjunct therapies. Dominion uses a multi-disciplined treatment team approach consisting of physicians, nursing staff, social workers, expressive therapists and other specialists.
