HopeTree Family Services offers a program of Supported Living/In Home Supports. The objective is to provide care, assistance and supervision to individuals while they remain in their own home. These services are supplemental to the care provided by a primary caregiver, including a parent or family member, or they may support an individual whose level of independence does not require a primary care provider. A plan for each resident is developed, outlining their support needs, as well as specific outcomes expressed by the individual, or evaluated as an area of need/challenge. The plan is then used to help each individual progressively strengthen his/her own individual knowledge, skills and independence.
