English

For individuals needing short-term care (one or two weeks) to provide respite for family or caregivers, the Shenandoah House is a beautiful residence nestled in a tranquil, wooded area on the Augusta Health campus. It is designed for hospice patients who no longer are able to live at home without assistance or who have no suitable caregiver at home. It has a homelike atmosphere with four private bedrooms and bathrooms, gardens designed to stimulate the senses, greenery year-round, an inviting kitchen, family areas, a fireplace, a piano, and more.
