Virginia Hospital & Healthcare Association (VHHA) has played a key role in the development of state laws governing healthcare decision-making and in assisting its members and the public in understanding and implementing state and federal laws that help patients make their own healthcare decisions.

VHHA worked with a group of experts to develop a brochure, "Your Right to Decide,"

(PDF) that describes the provisions of state law in terms that are easy to understand. It has been revised to reflect changes in state law that take effect July 1, 2009. Please visit [our website](#) to read this brochure and to see the different advance directive forms that you may consider.

No specific form of advance directive is required under state law, and several options are available.
