This program provides information about dental services for adults who meet program requirements. Services are provided by various partnerships between public and private providers. Applications for adult dental services are accepted in the Department of Family Services.

The Health Department offers an adult clinic in the evening. The Northern Virginia Dental Clinic provides some services to clients if they can pay a nominal fee. Private practitioners provide services in their own offices. These services are available at a reduced rate.

Please call (703) 71-5851 and ask to speak with the Emergency Support Services unit phone screener. If eligible, you will be assigned to a Case Manager who will discuss the various options and costs associated with your treatment.

Service Area(s)
Loudoun County
