Organization for Autism Research provides evidence-based resources that help families, self-advocates, educators, and other professionals address the challenges autism presents.

Programs also include:

- Navigating the Special Education System: Designed for parents, this guide offers the information and tools needed to successfully navigate the education system anywhere in the country.
- A Guide for Military Families: Military sources indicate that more than 13,000 military dependents, the majority of them children, have some form of autism.
