United States

The American Brain Foundation was established in 1992 by the American Academy of Neurology, an international professional association of more than 36,000 neurologists and neuroscience professionals. The American Brain Foundation has a unique research partnership with the American Academy of Neurology. This gives the Foundation access to the best and brightest minds to source the most high-risk and high-reward research, cutting across various diseases of the brain like

Parkinson's disease.

Our mission is to bring researchers and donors together to cure brain diseases and disorders. Our vision? Life without brain disease.

Service Area(s)

Nationwide
