Brain Injury Connections of the Shenandoah Valley provides community-based services for children and youth affected by brain injury in the Shenandoah Valley. Pediatric case management involves coordination with multiple agencies, including the school systems.

Pediatric brain injury case management involves:

- The brain injury community
- Education
- Awareness
- Resource dissemination, and
- Coalition participation

Case management is our core service and includes identifying needs and developing a plan of action to meet those needs. After determining what an individual needs and would like to accomplish, we identify and coordinate services to help them reach their goals. We also monitor progress toward those goals and build partnerships and teams to create a lasting network for continued support. Our primary function is to help individuals affected by brain injury return to their lives – to their homes, careers, school, and communities – to the greatest extent possible.

Brain Injury Connections of the Shenandoah Valley serves children, youth, and adults who:

- Have a documented acquired or traumatic brain injury;
- Have legal status in the U.S.; and
- Reside in our service area.

There is no cost to the individual for Case Management services. However, there are a limited number of slots available, and we are committed to serving those with the greatest need and the least resources first.
