\$0.00

Event Description

Low Vision Resources, February 8, 2023, Noon until 1 pm ET. Aging eye conditions, such as age-related macular degeneration and glaucoma, can cause permanent vision loss that affects independence and quality of life. Called low vision, this vision loss can make everyday activities seem impossible. The good news: there is still much that can be done! Join us for a live & interactive discussion to learn about the latest in vision rehabilitation and available community resources and services.

Suleiman Alibhai O.D, F.A.A.O and Sean Curry, MPH Prevention of Blindness Society of Metropolitan Washington®
