

Inpatient Rehabilitation

Programs that provide intensive rehabilitative services on a 24-hour basis for patients who are severely disabled as a result of injury or disease. Services include a thorough evaluation of the person's abilities and disabilities and the development and implementation of a rehabilitation plan which may incorporate physical, occupational, speech and/or other types of therapies; education about modifications in lifestyle which may be necessary including information about diet, exercise and stress reduction; guidance in using adaptive devices which maximize the person's functional abilities; and counseling for the person and/or significant others to facilitate a positive adjustment to the person's current condition. Services may be offered at rehabilitation hospitals or other inpatient rehabilitation facilities.
