Peak Season for Respiratory Diseases Is Near: There Is Still Time to Get Vaccinated

On December 14, CDC issued a Health Alert Network (HAN) advisory to healthcare providers and public health officials highlighting the increased respiratory disease activity occurring in the U.S. The HAN noted that low vaccination rates for COVID-19, influenza, and RSV could lead to more severe disease and a strained healthcare system for the rest of the season.

Asthma

Asthma is a chronic (long-term) lung disease that inflames and narrows the airways. This makes the airways swollen and very sensitive. They tend to react strongly to certain substances that are breathed in.
